DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 10, 2004 has been entered.

2. Claims 1-3 and 5-24 are pending in this application.

Response to Arguments/Amendment

3. Applicant's arguments with respect to claims 1-3 and 5-24 have been considered but are most in view of new grounds of rejection.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-3 and 5-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byrne, U.S. Patent No. 6,336,862.

Application/Control Number: 09/487,962

Art Unit: 3628

Regarding to claim 1, Byrne discloses a computer-implemented method of conducting a consecutive betting process for investors, the computer having a betting exchange unit for performing the following steps:

identifying an uncertain event having potential outcomes (column 14, lines 47-56);

initializing a first betting cycle (column 14, lines 52-53);

receiving bets from the investors for each of the potential outcomes during the first betting cycle to accumulate an initial bet total (column 14, lines 57-62);

issuing equal numbers of outcome shares, the outcome shares corresponding to the potential outcomes (column 2, lines 63-67);

assigning a share value to each of the outcome shares (column 2, lines 55-67, \$1 per share);

assigning quote values each of the outcome shares (column 3, lines 1-35, one share equal to Total super Keno minus tax and divided by total number of super Keno entrants);

distributing the outcome shares to the investors (column 3, lines 27-35).

Byrne calculates the quote value of the outcome share by minus the tax and seeding fee. Therefore, it would have been obvious to modify Byrne's to exclude the tax and seeding fee when calculating the quote value of outcome share for purpose of providing the quote value not include tax to the investor.

Regarding to claim 2, Byrne discloses monitoring an actual outcome of the futures event; and selecting from among the outcome shares winning shares

Application/Control Number: 09/487,962

Art Unit: 3628

corresponding to the actual outcome and determining a number of winning shares (column 5, line 47-column 6, line 15).

Regarding to claim 3, Byrne discloses the number of winning shares is selected such that number of winning shares multiply by share value equal to betting total (column 6, lines 5-15).

Regarding to claim 5, Byrne discloses monitoring the actual outcome is performed by a data acquisition unit (column 5, lines 47-50, computer).

Regarding to claim 6, Byrne discloses the investors comprise real investors and artificial investors (column 14, lines 47-56, player and game machine).

Regarding to claim 7, Byrne discloses wherein at least one artificial betting entity places a minimum initial bet on any of the potential outcomes for which corresponding initial bets are zero (column 3, lines 40-65, players have a choice to play bets on different game).

Regarding to claim 8, Byrne does not disclose the real investors are connected to the betting exchange unit by a communication network. However, it is well known that the investor can play game in the computer connected over a communication network such as the Internet. Therefore, it would have been obvious to modify Byrne's to include the feature above for the purpose of time consuming because the player does not need to go to the casino for playing game.

Regarding to claim 9, Byrne discloses the method further comprising the following steps: initializing a subsequent betting cycle; receiving amounts of money corresponding to subsequent bets from the investors on each of the potential outcomes

Application/Control Number: 09/487,962

Art Unit: 3628

during the subsequent betting cycle; receiving numbers of incoming shares in outcomes from the investors during the subsequent betting cycle; and re-assigning the quote values to preserve an equal number of outstanding shares in outcomes such that, wherein ...are number of outcome shares for outcomes newly issued during the subsequent betting cycle (column 4, lines 60-67).

Regarding to claim 10, Byrne discloses wherein the numbers of incoming outcome shares and newly issued outcome shares exchanged are in accordance with the reassigned quote values (column 4, lines 60-67).

Regarding to claim 11, Byrne discloses further comprising the steps of: monitoring an actual outcome of the future event; and selecting from among the outcome shares winning shares corresponding to the actual outcome and assigning a normalized share value to each of the winning shares (column 6. lines 35-60).

Regarding to claims 12, wherein the normalized share value is selected such number of winning shares multiply by share value equal to betting total (column 6, lines 5-15).

Regarding to claim 13, Byrne discloses wherein normalized share value is equal to a unit of currency (column 6, lines 53-60).

Regarding to claim 14, Byrne discloses determining amounts of outgoing money for each kind of outcome share (column 6, lines 20-35).

Regarding to claim 15, Byrne discloses determining the revised quotes (column 5, lines 25-45, the quote depends on the total amount of super Keno).

Application/Control Number: 09/487,962 Page 6

Art Unit: 3628

Regarding to claim 16, Byrne discloses the step issuing the equal number of outcome share includes solving a polynomial of having m+1 roots (column 6, lines 47-48, number of outcome share increase as the players enter the game and purchase the share).

Regarding to claim 17-24, Byrne discloses a system for performing the method of steps as discussed in claims 1-16, above, moreover, Byrne discloses: a means for sending the bets, a betting exchange unit, a computing unit, a distributing unit, an interface, and data acquisition unit (column 14, lines 47-56 and column 5, lines 47-67).

Conclusion

- 7. Claims 1-3 and 5-24 are rejected.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Nga B. Nguyen whose telephone number is (703) 306-2901. The examiner can normally be reached on Monday-Thursday from 9:00AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung S. Sough can be reached on (703) 308-0505.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 306-1113.
